Dear students of Louisenlund,

this brochure will introduce you to the wide variety of extra-curricular experiences that will be available this academic year 2020/2021.

Besides the classes, your participation in services, guilds, customized training and open offers make living and learning in Louisenlund special. I encourage you to discover yourselves.

If you want to commit yourselves to the school community beyond the average level, apply for an honorary post!
Take the opportunity to apply yourselves to experiences that define your personality, demonstrate your talent and promise fun and success. Enhance your strengths!

Also, I encourage you to try and discover new experiences. Act on stage, if you have never done before, learn how to sail or to play tennis, get involved in the students' enterprise LundAG or the fire brigade or debate heatedly at Debating Society. Challenge yourselves!
I would like to thank all our colleagues for contributing to the extra-curricular programme and for making holistic learning, achieving and living possible. My special thanks go to Mrs. Hau, who is, besides your mentors, your contact for everything concerning the extra-curricular programme and the IB CAS programme.
Have fun! Test yourselves! Discover your talents!

Dr. Peter Rösner

Extra-curricular programme of Louisenlund

The following pages give you an overview of our wide range of extra-curricular experiences.

The programme is divided into five categories:

1 Honorary post

These are tasks for students of Louisenlund who want to commit themselves for the school community beyond the average level. An honorary post requires a recommendation or an application and appointment.

2 Services

Students of Louisenlund should feel responsible and assume responsibility as well. Therefore, a service with regular attendance for at least one academic year is obligatory for every student.

3 Guilds

They help to discover and develop talents or enhance the students' profile. The guilds range from sports, art and music to business and politics. They need to be attended regularly for one academic year.

4 Customized training

The aim of customized training is to promote interests and talents or to minimize weaknesses individually. Time period and goal are clearly defined before the beginning of the training. Arising costs for customized training are charged separately.

5 Open offers

Depending on their mood, students can visit the open offers. Everyone is welcome. The students can discover themselves spontaneously and the participation is voluntary.

Corona measures

We have developed a concept for the coming school year to be able to run a boarding school and school for you continuously and reliably. The guild program must therefore be organized according to cohorts and inter-year guilds must be avoided. Therefore, the guilds will only be available for certain cohorts.

For the guild program we distinguish between different cohorts:

- Years 5 – 8
- Years 9 und E
- Years Q1 und Q2
- Years PreIB, IBY1, IBY2

Years Q1 and Q2 will have their guild afternoons on Mondays and Wednesdays, all other classes will have their guild afternoons on Tuesdays and Thursdays. In addition, Orchestra, Debating Society, and LundAG will be held in the evenings as inter-year guilds. Sailing, Rabbit and Co, Pottery, Tennis and Yoga will be offered on different dates for several age groups.

The school year is divided into 4 phases, and the guild program starts in the 3rd school week:

- 1st phase: 24.08. – 02.10.2020
- 2nd phase: 19.10. – 18.12.2020
- 3rd phase: 18.01. – 31.03.2021
- 4th phase: 19.04. – 18.06.2021

In order to allow for a greater variety, you will therefore only select services and guilds for one phase at a time in the coming school year. In this booklet you will find an overview of the honorary posts, services, guilds and individual activities. Changes may occur during the current school year.

Selection of experiences

Every student selects a service. The attendance of additional guilds depends on your grade level:

grade	selection
5 th - 8 th grade:	<ul style="list-style-type: none">• 1 service on Thursday• 1 guild on Tuesday optional: <ul style="list-style-type: none">• 1 guild on Thursday: Tennis, Sailing, Drama, Hockey Hof, Upcycling Handicrafts
9 th - 12 th grade:	<ul style="list-style-type: none">• 1 service• 1-2 guilds
STEM – classes:	<ul style="list-style-type: none">• 1 service

If you want to visit more experiences, you need to contact me. I will consult with the head of your grade to make sure, that you still would have sufficient time for the preparation and follow-up of classes and will inform you about his or her decision.

If you want to make benefit from customized training (category 4) such as instrumental lessons, tutoring or talent promotion, you need to sign up for it.

Election procedure

During the first two weeks of school you will be informed about the services and guilds and their content that are offered for your cohort. As a student of grades 5 - 8 you will receive the link for the online guild selection on 17.08.2020, as a student of grades 9 - 12 you will receive the link on 19.08.2020.

Please ask your mentor for advice in case you are not sure. Please note that a letter of motivation must be submitted for some guilds. If too many students select a specific experience, the places will be assigned to students according to the “first come, first served” principle. I will inform about the details in time.

If you come to Louisenlund at a later time of the academic year, contact me as soon as possible. Then I’m going to inform you about our extra-curricular programme and the CAS programme (if you’re an IB student) so that you can select your experiences.

Enjoy engaging in the experiences!

IB CAS Programme in Louisenlund

Why CAS?

Because you are more than just a grade average. CAS is intended to move you out of the academic arena and help you learn through life experiences. Yes, as an IB student, we know you are involved in many interesting activities. What we are asking you to do now is consider how these activities enhance your personal development.

So, for you as an IB Diploma Programme student, the extracurricular experiences of Louisenlund are even more important, because CAS is in the heart of the IB and is a requirement for successful completion of the IB Diploma Programme. **The three strands of CAS are:**

- | | |
|---------------------|---|
| C Creativity | exploring and extending ideas leading to an original or interpretive product of performance |
| A Activity | physical exertion contributing to a healthy lifestyle |
| S Service | collaborative and reciprocal engagement with the community in response to an authentic need |

CAS requirements

- engaged in experiences for at least 18 months
- regular attendance of experiences on a weekly basis
- CAS project of at least one month's duration undertaken, using the CAS stages: investigation, preparation, action, reflection, demonstration
- all seven CAS learning outcomes achieved
 1. Identify own strengths and develop areas for growth
 2. Demonstrate that challenges have been undertaken, developing new skills in the process
 3. Demonstrate how to initiate and plan a CAS experience
 4. Show commitment to and perseverance in CAS experiences
 5. Demonstrate the skills and recognize the benefits of working collaboratively
 6. Demonstrate engagement with issues of global significance
 7. Recognize and consider the ethics of choices and actions
- maintained and completed a CAS portfolio as evidence of engagement with CAS
- at least three formal documented interviews with CAS coordinator

Selection of CAS experiences

You select 3 experiences:

- 1 creativity
- 1 activity
- 1 service

to make sure that there is a reasonable balance between the 3 strands of CAS.

CAS project

In addition, you initiate a CAS project of at least one month's duration. A CAS project is a collaborative, well-considered series of sequential CAS experiences. It can address any single strand of CAS, or combine two or all three strands. Make sure to use the CAS stages as a framework for implementation.

CAS portfolio

You document your CAS experiences, noting in particular your reflections. Its extent should match the significance and depth of your involvement in the particular activity (there's no point in writing lengthy accounts about routine experiences). It must give the information what happened, why it happened, how it happened, what its value was, and what you have learned from it. For each experience/project, you show evidence of one or more of the 7 learning outcomes. Evidence may include, but is not limited to, the following: digital media (photographs, film/video, audio recordings, blogs, web pages), printed media (correspondence, published articles, posters, booklets) and physical objects.

CAS handbook

At the beginning of the school year during the IB Orientation Days, I will give you a hard copy of the CAS handbook of Stiftung Louisenlund containing all the details you have to know about the CAS programme. In addition, there is a pdf-version of the CAS handbook on Managebac which will give you access from anywhere at any time.

you must not just think or talk or write,
but must act."*
